
Helpful Email Resources: TOPICS

Thanks for the last video very revealing. So now I now where to find the emotions, toxins and hormones trauma & injury. Now is the question by which organ or tissue can you open this box to find them?

- emotions-brain
- toxins-anywhere
- hormones- endocrine system
- injury-whenever injury take place
- trauma-brain, hear, etc.

Each topic must be used on the appropriate organs and tissues. If you are not sure you will need to do further research.

Do you invert these toxins and emotions on the water and the hormones? But when you use Inner self process you do not invert them right?

Yes, most likely you'll invert those. If you are not sure read **the description** (if it is available) or search on google for a description and see if it is a negative or positive description. If negative, invert. If positive do not invert.

The screenshot shows a software interface with several components:

- Left Panel:** A list of conditions with checkboxes. The 'Brain Disorder Table' is selected. Below the list are buttons for 'CHOOSE', 'CLEAR', 'SHOW ALL', and 'SORT'.
- Center-Left:** A 3D anatomical model of a human brain.
- Center-Right:** A spectral graph with a grid. The x-axis is labeled with values: 1.8, 2.6, 3.4, 4.2, 4.9, 5.8, 6.6, 7.4, 8.2. The y-axis has markers at 2 and 4. Multiple colored lines represent different data series.
- Right Panel:** A list of anatomical descriptions corresponding to the x-axis values. A red arrow points from the text 'the description' to the 'ETALON DESCRIPTION' button. Other buttons include 'EXIT', 'VEGETO TEST O.', 'VEGETO TEST C.', 'ANALYSIS +', 'A-', 'A+', 'REPRINTER', 'AURA', 'AUTO SCAN', and 'AUTO MODEL'.
- Bottom Panel:** Buttons for 'ADJUSTMENT', 'ENTHROPY ANALYSIS', 'ADJUST ALL', 'NLS - ANALYSIS', 'SAVE TO NOTES', and 'NOTES'.

But it looks like to me you have a trauma that you invert that on the water if it's strengthening the organ is it not? Because the trauma is aggravation the organ but what say about hormones is this mean when you have testosterone in a female is that meaning to much or to low? So how do you now you have to invert them or not?

For this we use the Biochemical topic not hormone topic. If you are interested in learning about hormones in the body you've gotta go to the source (the endocrine system) and look there under Biochemicals. Otherwise look for coefficients with coefficients below 0.500

Than a other question when you do the auto model than you see numbers for these issue is that telling you that this organ it's most aggravation is where the number are in front of the toxins or other things? We did this with inner self process see the picture below will this also say that say in this picture you do not listen to your inner wisdom and your inner realization? And do you put them on the water invert or not invert?

Yes invert to balance. Look in description.

1. It will be in Chinese

The screenshot shows the software interface with the following elements:

- Left Panel:** A list of items with checkboxes. The item "Inner realization" is selected. Below the list are buttons for "CHOOSE", "CLEAR", "SHOW ALL", and "SORT".
- Top Center:** A 3D diagram of a human brain.
- Center:** A line graph with a grid. The x-axis has values 1.8, 2.6, 3.4, 4.2, 4.9, 5.8, 6.6, 7.4, 8.2. The y-axis has values 2 and 4. Multiple colored lines (red, blue, green) are plotted on the graph.
- Right Panel:** A vertical stack of buttons: "EXIT", "VEGETO TEST O.", "VEGETO TEST C.", "ANALYSIS +", "ETALON DESCRIPTION", "A-", "A +", "REPRINTER", "AURA", "AUTO SCAN", "AUTO MODEL".
- Bottom Center:** A list of items with checkboxes. The item "Inner realization" is selected. Below the list are buttons for "ADJUSTMENT", "ADJUST ALL", "SAVE TO NOTES", "ENTHROPY ANALYSIS", "NLS - ANALYSIS", and "NOTES".

2. Right click on any of the items in the topic and choose "translate etalon"

3. You will get this box

The screenshot shows the software interface with a translation dialog box open. The dialog box has the following elements:

- Top Panel:** A list of items with checkboxes. The item "Inner realization" is selected. Below the list are buttons for "CHOOSE", "CLEAR", "SHOW ALL", and "SORT".
- Top Center:** A 3D diagram of a human brain.
- Center:** A line graph with a grid. The x-axis has values 1.8, 2.6, 3.4, 4.2, 4.9, 5.8, 6.6, 7.4, 8.2. The y-axis has values 2 and 4. Multiple colored lines (red, blue, green) are plotted on the graph.
- Right Panel:** A vertical stack of buttons: "EXIT", "VEGETO TEST O.", "VEGETO TEST C.", "ANALYSIS +", "ETALON DESCRIPTION", "A-", "A +", "REPRINTER", "AURA", "AUTO SCAN", "AUTO MODEL".
- Bottom Center:** A list of items with checkboxes. The item "Inner realization" is selected. Below the list are buttons for "ADJUSTMENT", "ADJUST ALL", "SAVE TO NOTES", "ENTHROPY ANALYSIS", "NLS - ANALYSIS", and "NOTES".
- Translation Dialog Box:** A window with a table of translations. The table has columns for "NAME", "DESCRIPTION", and "LANGUAGE". The "Inner realization" item is selected in the table. Below the table are buttons for "Translate", "Add", "Replace", "A +", "A -", "UPPER", "lower", "name", "English", "English_DOG", "Russian", "Russian_DOG", "Afrikaans", "Albanian", "Amharic", "ShowAllTopic", "DeleteLeftSymbol", "Visible Languages", and "Show language".

Gives you translation in English.

I DO NOT TRANSLATE ALL TOPICS BECAUSE THERE ARE TOO MANY TO TRANSLATE BY HAND. IF YOU VENTURE INTO OTHER TOPICS YOU MAY NOT GET TRAINING THERE SO YOU WILL NEED TO DO FURTHER RESEARCH ON YOUR OWN OR SEND ME TOPICS YOU ARE INTERESTED IN AND I can help.
