*Helpful Email Resources: AUTO THERAPY JUMP*

---

Dear Diana,

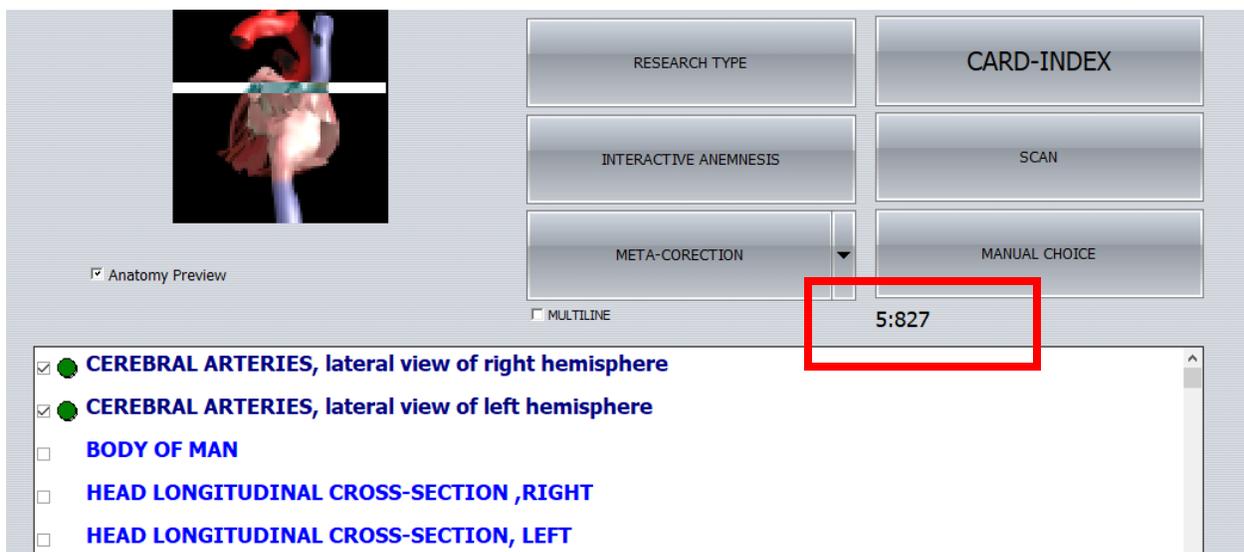

When you give therapy and you looked up to which organ you want to give therapy. The first therapy goes correct than it jumps over to a other organ.

I had this now with the lymphatic vessels of the right leg and we get than by the 2e therapy the vein vessel transversal section meta therapy

Is did not strange?

All the best,

You must always make sure that you look at how many things are cheeked marked before you begin therapy.

Where it says 5:827

If you wanted to treat 1 area but there are 5 selected you must Manual Choice and DESELECT and make sure you have the correct number checked before beginning therapy.
