

1. Proteus and Cystitis

- Hello Diana I send you a success story of a client of mine

The story!!!

She is a 73 years old lady she came to me because she had a terrible pain to her urinary system , she did exams test to the laboratory and they told to her that she had proteus and cystitis so they told to her to take 2 different antibiotic.

Despite her pain she wanted to do therapies with Oberon.

We start the same day and the scan find others microorganisms. So i trust it and start every day metatherapy on the third therapy the pain had gone. We did 12 days (every day therapy) and she did again test to the medical laboratory and the results was amazing, the doctor there told to her that the antibiotics did the job, so her problem had gone. But the truth is that she never took any medicine!!!! Only Oberon therapy and some alternative medicine like hydrolytes Also i send you and the papers of the laboratory the previous and the next.

Thank you

Dr.lakovina Louki MD/IPHM, Greece

- Woman 40 years. Very sharp pain in the right ovary in five months. Having visited the doctor several times without success. I treated her for 30 minutes, and her pain was near zero. Five days later, it came out a big lump of phlegm. Since then there has been good. With strengthening treatment problem was solved and has not returned!

Ola Hulden, Sweden

- Someone came to me yesterday in so much pain she couldn't stand straight. Software found a cyst. We did meta therapy and made a remedy. She told me her pain had already lessened by last evening!

2. Heart Failure

Hello Diana,

I am scanning and sending therapy remotely to an 82 yr old, since Sept 2, that has been told she has heart failure. Everything in Cardiovascular is Chronic and just about all energy level is black. She seemed to be gaining progress until today. Just about every KOD has dropped and a lot went from acute to chronic today, but there is an increase in the energy percentage. Should I be concerned with this?

I scanned the first time on 9/2. She had a mini stroke that night but begged me to keep treating her. She had many tests...brain scan and scoped behind the heart. She was told there wasn't anything wrong. I am treating cardiovascular system daily and I check with her daily to see how she is feeling. Arteries of the medial surface of cerebrum left side has only had 10 % energy level and all level 5's. Today!!!! 27 level 4's. I am so excited. I asked her how she was feeling and she said she just washed her sheets and remade her bed. She said she has more energy today than she has for quite some time. Yay! Love Oberon!!!

3. Autism/Blindness

I work with Autistic children in London. After doing 1 month of daily therapy with a child, he began to speak and not only speak well but now learning 3 languages!

Some kids are recovering very fast, some not.

They have speech therapy every day.

But everyone can see the changes from Oberon.

They are calmer, more present in the present time, they sleep more hours from the beginning they start the therapy.

The vitamins intake is very important and the food.

No gluten, no sugar, no milk, food must be organic.

I also worked with a BLIND man who is 85 years old and same thing, one-month, daily therapy and he is beginning to move his eyes and noticing some vision return.

Eli Madzirov, London/Maccadonia

I wore glasses for the last 9 years...tri focal, with a muscle corrector. I started remedies made with Oberon and 3 weeks later I was out for dinner with a friend, as conversation started, I realized that I was did not have a tension head ache and was not wearing my glasses! Normally I

would have a tension head ache within minutes of not wearing those glasses. I have not worn glasses in six weeks and no headaches!

4. Seizures

A 19 yr old girl that has seizures and was told she doesn't have epilepsy. She started with and eye flutter and was put in med then started having Grand Mal seizures. She was weaned off that med and went back to eye flitters. Then told it could be hormonal. Put on depo and having grand mal seizures again. I have been treating her remotely since July 17th. She had a grand mal seizure a few days before I saw her. She recently had a test, EEG where they stimulated her brain to have a seizure. Her mother called me today with the results of the test. SHE DID NOT HAVE ANY SEIZURES!!! She has had these tests every year since 2014. Last year she measured 7. And the doctor didn't have any explanation for this. Also, her bloodwork for the med she is taking measured low!

Janie Love, USA

5. Varicose Veins

Woman 88 years. Great pain of varicose veins. Treatment of veins, venous tissue, lymphatic veins and muscles in the legs. Five treatments and she is pain free for 8 months. Follow-up 2 treatments makes her pain for 6-8 months. We have not solved the problem of varicose veins but she is completely painless and no problems.

Ola Hulden, Sweden

6. Glaucoma

I had a client who had eye glaucoma and macula problems we did therapy three times in one week then he was sent to major clinic for operation and they could not find anything to operate for.

Linda McFadyen, Australia

7. Cancer

- Then there was a guy with prostate cancer stage 4 he had three weeks of therapy along with the Biomat and there was nothing for them to operate for. I just love what we can do and it is thanks to you and your team!

Linda McFadyen, Australia

- I had been diagnosed with stage 3 ovarian cancer and after 4 months of daily therapy I went back for a check up and my doctor was amazed to tell me that I was Cancer FREE!!! I treated myself several times a week to achieve this incredible result!

Elizabeth Adam, USA

- I have some amazing news regarding a girl of 24 who was diagnosed with stage 4 breast cancer. The doctors had told her that she was terminal and had months to live. I sent her supplements and personally did daily distance therapies as she could not afford the therapy. I worked on her consistently from September - April but heard nothing, I did not want to contact her in case she had passed away or felt obliged to pay for therapy. A mutual friend came to the clinic and said have you heard about (the girl) - she is completely cancer free. I got this message from her yesterday:
Hello !!! I really hope you're well? Chloe mentioned that you were continuing my distance therapies throughout the beginning of the year. Can't tell you how grateful I am and I know that it contributed to my current health. Honestly eternally grateful I am currently cancer free and have been since February. I haven't had any chemo since then and continuing to get clear scans every 10 weeks - anything is possible !!!

Marie Reynolds, UK

8. Depression

I had a client come in with depression, we looked in Oberon and THERE IT WAS! I treated her that day and again for a few weeks. She was really amazed to say that she was feeling better and felt "lighter" in her mind. We researched and found that there were microorganisms which possibly caused a chemical imbalance in her body and mind which we also treated in each session. She was considering suicide for a long time and now is in a happy relationship loving life!

9. Parkinson's

I have been scanning and treating my brother-in-law for Parkinson's disease. He has had the disease for about seven years. He has had six brain surgeries, and has electrodes in his brain that are hooked up to a battery and can be adjusted to help with the tremors. It does not stop the progression of the disease. Because of the electrodes I have not been able to scan him with the headphones. We decided to try remotely. I started treating him on August 6. He has had very noticeable improvement. He uses a walker or cane the majority of the time and has someone with him just about 24/7. He has a very difficult time with sleeping and that seems to add tremendously to his daily struggles. He also has had ringing in his ears for two years nonstop. I started treating nervous system and micro cells every day through remote and we cannot believe the change in his quality of life in the short time! I have contact with him daily to see how he is doing. He is sleeping all night! He has reduced his medication for Parkinson's by half because he was having dyskinesia. He has gone from five Dopamine shots a day to one or two!! My niece called me the other day to tell me he was mowing the grass. That is something he has not done in over two years! Incredible!

10. Eye Problems/Disease

I have been doing therapy now for three different men who have different eye problems each one is responding greatly with Oberon

One has had expensive visits to specialist Doctors who have done surgery to cut off the eyelashes and skin graft from roof of mouth to underside of eyelids because they told him he had rare disease we looked on Oberon it said in list the problem was just parasite causing ingrown eyelashes we have been therapy now and the problem is not there now

One fellow had rupture in back of the eye doctors sent him to specialist who told him he would need injections of chemotherapy into eyeball which he did not want so before the next visit to them he came here twice for therapy they tested with xray and could not find the rupture the damage was not there. Then after one month he came here three times then visited Doctors again they said they could not believe that there was nothing showing up

Linda McFadyen, Australia

11. Skin Infection

Let me give you some good news in this interesting times...
It is visible to see the condition of the child.
After one month therapy, he was completely healthy child.
Every time I am amazed with the results of the Oberon.

The child has streptococcus and candida infection, also milk and barley allergy. I gave him therapy and he also stopped having cow milk and barley.

After 1 month of therapy results photo - - - - - >

Interesting personal experience. I was having vertigo for about 5 days. Decided to scan my nervous system. Almost all scans were 5s and 6s. Result found "dizziness". I scanned brain tissue with homeopathic topic. Result was homeopathic phosphorus would help me 94%! Looked up uses of phosphorus and this is what Google said; Phosphorous is a beneficial remedy for vertigo treatment, especially if you are more than 60 years. The remedy works best on symptoms that take place when you wake up in the morning. It helps in treating the overall feeling of whirling, fainting, and floating. These are some of the main symptoms of vertigo.

There were other results that were so specific to my health conditions. Oberon continues to amaze me.

PS - my vertigo is gone!! Metathery of nervous system plus phosphorus 30c for 2 days.

I am so humbled and blown away.

A three year old client with PANS has made a 60% improvement in less than a month.

Oberon has been a heavy lifter in the suite of therapeutic healing supports I have used to treat him.

Here's an amazing Oberon story. A young man asked me if I could scan him two days ago. He said he was having some pelvis or intestinal pain and thought he may have a hernia. He did not give me a lot of information because I think he was uncomfortable with discussing where his pain was located. So I scanned the urogenital area and found microorganisms and the pathology of varicocele. 58% weakening.

I did a lot of meta therapy/destructive therapy for the urogenital system. I also used the reprinter for the pathology. Finally, I used physiotherapy and after two days HIS PAIN IS GONE! He was ready to go to the emergency room. Thank you, Diana, for everything you have taught me. Thank you, Oberon! Yay!!!!

Eli Madzirov

This boy had eczema and asthma almost 6 years. After 2 months remotely and in person therapy, he is eczema and asthma free. He is healthy boy now.

Eli Madzirov

this skin condition is treated with success , the same protocol as mentioned was used on the client of mine . diet changes are must. I am Keto couch by Dr Berg method , so the client was on Keto diet. This picture was taken after one month therapy, the client was coming for 6 months and nowadays is completely healthy, the skin is rejuvenate completely.

I believe in miracles because I am seeing them.

I have been working with a very complex case of neuro-degeneration/retardation in a non-verbal, non-mobile three year old who has had been told that she has a genetic defect. After all the therapies the parents have done, absolutely no movement, including open heart surgery. The father is a gifted physician.

Just ten days of Oberon (but also combining Photonwave therapies synergistically) the parents report starting to see changes and the child is starting to smile more. This is in itself a miracle! I am very profoundly grateful for the gift of Oberon (and the other tools I work with), to give hope to a family in an utterly hopeless and impossible health crisis.

Sharing a story of how Oberon is supporting healing for an adult with autism. Oberon has been a keystone part of her healing protocol. Even in a single session can see dramatic physical changes in her from the start of a session to the end of it.
